Providence, R.I.

New England Regional Turfgrass Conference & Show

Success Through Innovation....

Welcome to the New England Regional Turfgrass Conference & Show. It is an honor to gather once again with professionals, educators, students, and industry partners who continue to elevate the standards of turfgrass management throughout our region.

This year's theme, "Success Through Innovation," speaks directly to the challenges and opportunities facing our industry. From changing environmental conditions to evolving expectations from the communities we serve, turfgrass professionals are navigating a landscape that demands creativity, resilience, and forward-thinking solutions. Innovation is no longer optional, it is essential.

Throughout the conference, you'll find countless opportunities to explore new ideas: cutting-edge research from leading universities, emerging technologies that are reshaping our daily operations, practical sessions that tackle real-world challenges, and a trade show offering the latest products and tools designed to help you work smarter and more sustainably. But innovation is not solely about new equipment or advanced science. It is also about collaboration. The strength of our profession comes from the sharing of knowledge—across disciplines, across generations, and across the many sectors that make up the turfgrass community. Together, we continue to redefine what success looks like for sports fields, golf courses, municipal landscapes, and all the green spaces that enrich life in New England.

Thank you for your commitment to excellence and for being part of this year's conference. I encourage you to engage fully, ask questions, make connections, and carry the spirit of innovation forward into your work. By doing so, we ensure not only the success of our own organizations, but the long-term vitality of our entire industry. Wishing you a productive, inspiring, and enjoyable conference.

Some of the 2026 Featured Speakers

Dr. Gerald Henry is the Athletic Association Endowed Professor of Environmental Turfgrass Science at the University of Georgia. His research focuses on reducing inputs through precision turfgrass management, improving athletic field performance and player safety, weed biology and ecology and ecosystem services.

Dr. J. Scott McElroy is a Professor at Auburn University and has dedicated the majority of his life on earth to killing weeds making grass better for all people. Dr. Scott received his Ph.D. from NC State Univ., worked a stint at the University of Tenn., and has been toiling away at all things turfgrass at Auburn for the last 18 years.

Dr. Travis Gannon is a professor in the Dept. of Crop Science at NC State University and serves as the co-director of the Center of Turfgrass Environmental Research and Education. His research and outreach efforts support the development that balance effective management with environmental sustainability.

Ms. Bre Schultz took her passion for keeping equipment running to become a true powerhouse in the world of small engine repair. She created the Podcast "Chickanic" that today has one million followers and more than two hundred million views. She breaks down complex repairs into no nonsense tutorials on small engines and more!

Dr. Olga Kostromytska, is an Extension Assistant Professor at the University of Massachusetts with a research program focused on gaining a better understanding of biology and ecology of turfgrass insect pests, developing sustainable management strategies, reduced insecticide applications and investigating resistance mechanisms to identify and solve insect pest problems.

Dr. Mike Fidanza is a Professor of Plant and Soil Science at the Pennsylvania State University (Berks Campus). His research focus includes turfgrass ecology, plant health products, soil surfactants, seed technology, and cultural practices in turfgrass ecosystems.

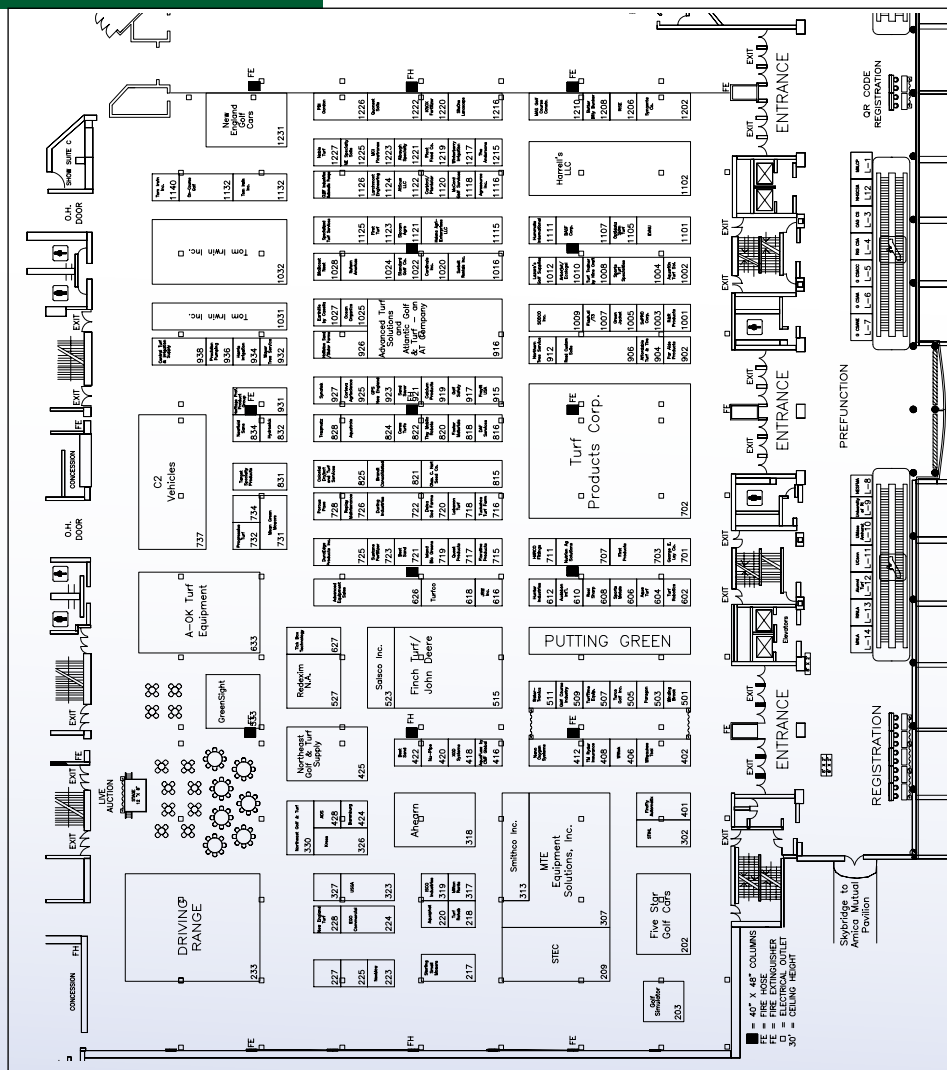

Mr. Lee Butler has worked at NC State University for 26 years in Turfgrass Pathology. He presently runs the diagnostic lab which assists turfgrass managers worldwide with disease diagnosis and management. Lee helps to manage their fungicide efficacy trials in addition to teaching turf students the art and science of turfgrass pathology.

Show Highlights

DON'T MISS THESE!

Tuesday Seminar Reception | 5-6pm (5th Floor Rotunda)

Unwind after a full day of seminars with light fare, beverages, and networking.
Sponsored in part by Atticus.

Wednesday's Ball Park Lunch

Discover what a Ball Park Lunch is at the TPC booth (#702). Sponsored by Turf Products, Inc.

Wednesday and Thursday Morning Refreshments | 7am

Fuel up with breakfast and beverages outside the 3rd Floor Trade Show. Sponsored by Fore the Turf, Turf Enhancement Enterprises, and Winding Brook Turf.

Wednesday Show Auction and Refreshments | 4pm

Head to the Trade Show floor for the 21st Show Auction. Bid on exhibitor items supporting Turfgrass Research. Beverages sponsored by BASF and Calcium Products.

Wednesday Conference Reception | 5pm-6:30pm (5th Floor Rotunda)

Network and enjoy food and drinks. Sponsored in part by Read Custom Soils.

Thursday Morning Coffee Bar | 7am

Start your day right with a coffee Compliments of STEC

Thursday Trade Show Lunch | 11:30am-1pm

After an exciting three days, Join us for a hearty lunch to close out the show.
Sponsored by Atlantic Golf and Turf, Advanced Turf Solutions, Envu, and Syngenta.

Play The Nine Holes on the Trade Show Floor

Visit exhibitors and win prizes Sponsored by Target Specialty Products.

Research & Innovation

Unfortunately, we sometimes work in a profession that can experience death (turf) and destruction. When turf loss occurs, analysis (research) is needed to determine the cause and adjustments (innovations) are warranted to avoid future failures. During our investigation it might be determined that the loss was unavoidable, a natural occurrence that normally your turf would not be exposed to. It might also show signs of a crack in our protective shield that exposed areas to its own vulnerability. Each day includes factors, good and bad, that can influence turf health. Regardless of the determined cause, how you move forward might be a key to your success. Recovery doesn't just happen, and many steps might be involved. Past challenges and accumulated experiences teach us how to correct our course through turbulent times. Consultation with researchers and peers could be advantageous resources for planning future strategies. Sitting idly and hoping for a better outcome will only guarantee uncertainty and complacency. As they say, tools don't make the mechanic, it is how they are used that will make the difference! Using the tools available to you like research and innovation can put you on a path to recovery and success.

Recertification Credits

Pesticide Applicator recertification credits have been requested for New York and New Jersey. Education Points (EP's) have been approved by the GCSAA.

Rhode Island pesticide applicator and recertification contact hours have been approved for the sessions below. The equivalent categories have been approved in Massachusetts, Connecticut, Maine, New Hampshire and Vermont.

Categories:

3A	=	Shade Trees
3B	=	Turf & Ornamentals
Pvt.	=	Turf or Nursery
10	=	Research & Demonstration
CL	=	Commercial License
DL	=	Dealer License

Note: A form will be provided for verification which will be stamped after each completed am or pm session. Attendance verification will NOT be available at other times. Where more than one presentation is approved per contact hour, applicator must attend all presentations to receive credit.
